

BI-02A.55 Service and park brake design

(Accountable - Engineering Manager (Site) (Unassigned))

Expectations

Mobile equipment operators are alerted if mobile equipment is operated with the service and/or park brake engaged.

Specify

Equipment specifications include control or monitoring systems that alert mobile equipment operators if the service and/or park brake is engaged during operation.

Implement

Ordering / selection of equipment is based on meeting specifications.

All equipment in use is approved and documented.

Monitor

Competent person (e.g. reliability engineer, maintenance planner, asset manager, etc.) receive Intro to Site documentation (and add to site Asset register). OEM provided documentation is added to the Asset Plant Safety File.
