

BI-03.02 Operators follow site parking requirements

(Accountable - Operations Manager (Unassigned))

Expectations

Site requirements for parking in any situation understood and applied by vehicle operators.

Specify

Training modules for vehicle operators should include specific information on parking requirements for all scenarios and cover:

- Ensuring that a parked vehicle is always fundamentally stable
- Breakdown situations in operating areas
- Site requirements such as the use of wheel chocks
- Mobile equipment fires or potential fire situations

Implement

Training and assessment of vehicle operators covers parking in all situations and achieving fundamental stability.

Monitor

Training system records confirm currency of skills including understanding parking requirements.

Supervisors and peers monitor vehicle operator parking performance.
