

# BI-09B.03 Operator Fire Training

*(Accountable - Operations Manager (Unassigned))*

## Expectations

Operators of all classes of mobile equipment undertake fire response training.

## Specify

Training for operators of all classes of mobile equipment (including contractors and hire equipment) covers:

Fire prevention information

- Prestart checks covering fluid leaks, smoke, smells, return to service maintenance standards
- Housekeeping standards for operator cabs
- No smoking rules
- Tests for brake and retarder functionality and use

Fire mitigation measures

- Alarms
- Parking up faulty vehicles (e.g. alarms, defective brakes, flat tyres, tyre overheating)
- Manual actuation of fire suppression system
- Dealing with a tyre fire
- Fire extinguisher access and usage checks
- Weekly shake-up of powder-type fire extinguishers to prevent powder packing.

## Implement

Operators are trained and assessed for competency.

## **Monitor**

Training management systems confirm currency of general fire awareness and response skills for all workers on site.

Reviews conducted by supervisors and managers confirm understanding of fire awareness and response skills.
