

CFM-ER-21 Emergency Responders take actions which make the effects of the fire more significant

Emergency responders make the situation worse by taking some actions such as:

- Switching off or reversing mine ventilation
- Approaching the fire in a way which introduces more fuel or oxygen to the blaze
- Moving into a position in the line of fire from any failing tyre or component
- Using incorrect extinguishing methods which cause the fire to spread (e.g. water onto oil fire leading to fire spread to drainage lines/other site locations)

Credible Failure mode is addressed by:

- 🛡️ BI-09.01 Emergency Preparedness
- 🛡️ BI-09.02 Emergency Response - Withdrawal of People
- 🛡️ BI-09.03 Strategy for testing, reviewing and maintaining the currency of the emergency response plan
