

CFM-OP-40 Unapproved mobile equipment put into service

Equipment that is not matched to site conditions is deployed (either initially on site or during its service life on site) that has a fire related issue - caused by:

- Bypassing mobile equipment introduction to site processes
- Operating a machine with an out of service tag
- Inadequate systems to report machine faults
- Operating machine that is overdue for a service
- Inadequate system to ensure compliance with introduction to site process
- Poor management of sub-contractor equipment introduction to site and servicing requirements by contractors
- Entry by third party in a vehicle (trespasser, surface vehicle driven underground, etc.)

Credible Failure mode is addressed by:

- 🛡️ BI-02.01 Introduction of equipment to site process
- 🛡️ BI-02.31 Operator prestart checks include brakes, steering, tyres and running gear
- 🛡️ BI-04.02 Appropriate system for scheduled inspections including structured checklists and defect reporting
- 🛡️ BI-05.01 Change Management Process
- 🛡️ BI-05.03 Effective contractor management processes
