

BI-00D.01 There is a documented site Traffic Management Plan

Expectations

Mobile equipment management is well coordinated, practical and integrated with routine operational and business processes.

Specify

There is a site process for developing and implementing a traffic management plan (TMP) or equivalent that:

1. Documents the safe and productive outcomes required when working with or around mobile equipment;
2. Identifies the situations and circumstances, where working with or around mobile equipment can result in fatalities, injuries and incidents;
3. Details the business and operational processes that prevent or mitigate the development of these situations and circumstances;
4. Confirms how the status of these business and operational processes is monitored;
5. Describes how these business and operational processes are maintained and improved
