

BI-01P.10 Minimum requirements for parking in any situation - information prepared for operators

Expectations

Site requirements for parking in any situation are documented and communicated in a style that is appropriate for the audience.

Specify

Training for vehicle operators should include specific information on parking requirements for all scenarios covering:

- Ensuring that a parked vehicle is always fundamentally stable e.g. through the use of wheel chocks, ditches, trenches or wheels turned towards the wall
- Requirements for vehicles to be parked in nominated locations or else parked to minimise potential for unwanted vehicle interactions
- Servicing, maintenance or breakdown or situations in operating areas
- Mobile equipment fires or potential fire situations

Implement

Training and assessment of vehicle operators covers parking and achieving fundamental stability.
