

# **BI-01P.11 Vehicle lights and markings requirements - information prepared for operators**

## **Expectations**

Site standards for vehicle lights and markings requirements are documented and communicated in a style that is appropriate for the audience.

## **Specify**

Vehicle operators and co-workers routinely check lights and markings are operational and visible.

## ***Implement***

Vehicle operator, maintainers and co-workers are assessed on their understanding of minimum site standards for vehicle lights and markings.

Mobile equipment prestart checks confirm that lights and markings meet minimum standards before the equipment is operated.

Light failures during operations are identified and repaired.
