

BI-01S.02 Pre-commencement and periodic medicals for mobile equipment operators

Expectations

Pre-employment and periodic medicals should ensure personnel are capable of fulfilling position requirements.

Specify

Personnel who have or apply for mobile equipment operation roles have pre-commencement and then periodic medicals that confirm that they are to safely and productively carry mobile equipment operation tasks. All medicals are carried out by appropriately trained personnel with oversight from a physician. Medical assessments consider all regulatory requirements.

Implement

Mobile equipment operators attend medical appointments.
