

BI-02P.04 Regular checking and maintenance of alarms, monitors, cameras and other warning devices

Expectations

Mobile equipment alarms, cameras and advice screens are functional during operations.

Specify

Maintenance strategies related to alarms, cameras and monitors are in place for all vehicles on site - with regular visual checks, measurements (with tolerances), and replacement of components scheduled based on OEM recommendations and site duty requirements.

Implement

Work orders for equipment on site are completed in a timely manner - and alarms, cameras and monitors in cabins are given a higher priority - with potentially more frequent proof testing and replacement.
