

BI-03D.03 Competent and site experienced water cart operators

Expectations

Dust is well controlled without overwatering the road surface.

Specify

Site performance requirements are in place for water cart operators so that dust is controlled without creating a slippery road. Performance requirements include:

- Spray application e.g. strip spraying
- Spray bar patterns and timing
- Water application based on speed
- Using an automated spray system

Implement

Trainers reinforce importance of watering and communication for water cart operators.
