

BI-05D.01 Clear accountabilities for managers, superintendents and supervisors are included in comprehensive, site relevant road design guidelines and traffic management plans

Expectations

Site road design guidelines and traffic management plans identify specific accountabilities by organisation position.

Competent senior managers, line managers and supervisors understand their accountabilities to:

- Develop and maintain roads that meet road design standards including meeting regulatory requirements
- Develop and maintain effective traffic management plans

Specify

Site road design and traffic management plans document required competencies and accountabilities by position.

Implement

Line managers are confirmed as being competent in meeting their accountabilities for mine design and traffic management plans. There is a formal process for approving new roads development and traffic management plans. This includes ensuring that all regulatory obligations are met.
