

# **BI-05D.02 Clear accountabilities for planners are included in comprehensive and site relevant road design guidelines and traffic management plans**

## **Expectations**

Site road design guidelines and traffic management plans identify specific accountabilities for planners to ensure that resources are allocated and managed for:

- Developing and maintaining roads that meet road design standards
- Developing and maintaining effective traffic management plans

## **Specify**

Planners reference and apply site road design and traffic management plans to ensure safe and productive operations.

## ***Implement***

Short term planners trained and assessed in mine design guidelines and develop plans according to the guidelines. Issued designs are formally reviewed and marked as approved to mine / construct. Traffic management is considered at each process step.
