

# **BI-04D.21 Road design guidelines specify minimum parking area requirements**

## **Expectations**

Parking area designs are fit for purpose. Parking areas are constructed and maintained to meet site requirements.

## **Specify**

Parking area designs and construction include layouts for crib areas that segregate vehicle types and provide walkways at safe locations.

## ***Implement***

Designs are executed by road construction crews - placing windrows and berms as required to segregate vehicle types and walkways.
