

# **BI-04P.08 Pedestrian working in operational area communications protocol**

## **Expectations**

Personnel working on the ground in mobile equipment operational able to effectively communicate.

## **Specify**

When personnel are working on the ground at least one member of the work party must be in possession of a two way radio or equivalent.

Standard radio (or other communications) call up protocols are followed.

When pedestrians cannot move to a position of safety in a roadway, the vehicle must stop, the operator must acknowledge the pedestrians presence and allow the pedestrians to walk past the vehicle before continuing

## ***Implement***

Training and assessment in requirements for working in operational areas are provided at induction and reinforced in training. Start of shift or similar briefings identify workgroup interactions and confirm required communication before entry and during work. Permanent or mobile signs provide call up information
