

BI-04P.10 Specification covering escorting requirements

Expectations

Vehicles that are not approved for unrestricted site access are escorted. Site escort requirements are clear and deliver safe and productive outcomes.

Specify

Short term access for vehicles that do not meet site requirements is managed using the site escort process.

Vehicle operators being escorted are briefed on communication protocols, travel separation distances, restricted locations, road conditions, emergency protocols etc.

Personnel who provide the escort are authorised.

Implement

Training and assessment of vehicle operators in escorting requirements. Access under escort permit by any vehicle not approved for unrestricted use on site.
