

BI-04P.11 Protocols for working on equipment in production areas

Expectations

Personnel undertaking servicing, maintenance or recovery work on equipment in operational areas are protected from mobile equipment and other workplace hazards.

Specify

Clear requirements for trades and service personnel to protect themselves from moving equipment (and other energy sources related to their tasks) when working in production areas.

Implement

Trades and service personnel meet site requirements for working on equipment in production areas - with placement of windrows and warning signage, and other measures implemented.
