

BI-04T.20 Proximity detection, alerts, advice, and intervention

Expectations

When proximity detection monitoring systems are fitted, they have operator alert, advice and intervention capabilities that meet site functional and performance requirements.

Specify

When proximity detection monitoring systems are fitted, they have operator alert, advice and intervention capabilities that meet site functional and performance requirements.

- EMESRT Level 7 - alerts the operator
- EMESRT Level 8 - advises the operator
- EMESRT Level 9 - intervenes and takes control from the operator
