

# **BI-02D.10 Operator ergonomics are considered for controls and before introducing vehicle alarms and other aids**

## **Expectations**

Control panels/devices, alarms and other aids introduced to alert the operator and / or improve situational awareness add value and support cognitive ease for Vehicle Operators.

## **Specify**

Alarms and other aids must consider the operating environment and load on the operator

## **Implement**

New alarms and other aids are trialled and piloted before their introduction.
