

BI-02P.30 Regular and timely maintenance of communications systems equipment

Expectations

Operating sites have highly reliable communications equipment that supports safe and productive mobile equipment operations

Specify

Maintenance strategies related to communication systems are in place for all vehicles on site - covering availability and condition of vehicle mounted and handheld devices. The signal coverage of the Communication system is also assessed on a regular basis.

Implement

Work orders for equipment on site are completed in a timely manner, and communication systems are given a higher priority, with more frequent proof testing and replacement.
