

# **BI-04P.02 Around vehicle inspection/spotter in place before moving to identify/address work area hazards**

## **Expectations**

There are no unplanned vehicle to person or vehicle to vehicle contacts on first movement after parking.

## **Specify**

Before moving off from being parked, vehicle operators carry out an around vehicle inspection e.g. a HV walk around inspection.

If required by site - use of horns to indicate vehicle operation once prior to starting the vehicle, twice before forward movement, three times before reversing and where movement in constrained locations is required a spotter is requested by the Operator and nominated by a Supervisor to prevent unwanted interactions.

## **Implement**

Training and assessment in requirements for vehicle operators to conduct an around vehicle inspection prior to first movement after parking.
