

# **BI-04T.01 Ceasing Operations Procedure - significant interaction threats**

## **Expectations**

Sites should have cease operations processes (Trigger Action Response Processes/Plans) in place for situations for where significant interaction threats have the potential to develop.

## **Specify**

Develop and implement a process to cease operations in situations where it is no longer safe to operate mobile equipment because of significant interaction threats caused by:

- Unauthorised access (pedestrian or vehicles)
- Non reversible equipment moving underground

## **Implement**

Training and assessment in requirements for vehicle operators, supervisors and management

## **Monitor**

Supervisors and more senior management team members monitor site activities and mentor workers and react to non-conformances to site requirements.
